

### Vibrating filling level switch with extension tube

- For universal applications such as filling level detection or dry run protection system
- Installation without adjustment
- Ideal for the food, beverage and pharmaceutical industry with a surface roughness <0.8 µm
- ATEX approvals

Product variants described in the data sheet may differ from the product presentation and description.

#### Can be combined with

	<b>Type 2030</b> ▶ Pneumatically operated 2/2-way diaphragm valve CLASSIC with plastic valve body
	<b>Type 8644</b> ▶ AirLINE SP electropneu- matic automation system
	<b>Type 2301</b> ▶ Pneumatically operated 2-way Globe Control Valve
	<b>Type 8619</b> ▶ multiCELL - Multi-channel and multi-function transmitter/controller

#### Type description

The Type 8112 is a filling level switch for liquids, using a tuning fork as the sensor element.

It is designed for industrial use in areas of process technology and can be used in liquids. Typical applications are overfill or dry run protection.

The Type 8112 is available with different sensor lengths. The immersion depth can be adapted thanks to a lock fitting.

Due to the simple and rugged measuring system, the Type 8112 is virtually unaffected by the chemical and physical features of the liquid. It works even under unfavourable conditions such as turbulence, air bubbles, foam generation (not suitable for measuring the foam thickness itself), adhesions, strong external vibrations or varying filling materials.

## 1. General technical data

### 1.1. About the device

The vibrating level switch is available with double relay output or with NAMUR output. The technical data depends on the vibrating level switch variant.

### 1.2. All variants

#### Product properties

##### Material

Make sure the device materials are compatible with the fluid you are using.

Further information can be found in chapter [“3.1. Bürkert resistApp” on page 5.](#)

Further information on the materials can be found in chapter [“3.2. Material specifications” on page 6](#)

Surface quality	Ra < 3.2 µm (thread) / Ra < 0.8 µm (clamp)
Dimensions	Further information can be found in chapter <a href="#">“4. Dimensions” on page 6.</a>
Weight	Approx. 850 g + approx. 920 g/m (extension tube)
Probe length	200...1000 mm (including the extension tube Ø 21.3)
Measured variable	Limit level of liquids

#### Performance data

Measurement deviation	± 1 mm
Repeatability	0.1 mm
Hysteresis	Approx. 2 mm with vertical installation
Switching delay	Approx. 500 ms (On/Off)

#### Electrical data

Power source (not supplied)	Limited power source according to UL/EN 62368-1 standards or limited energy circuit according to UL/EN 61010-1 paragraph 9.4
Overvoltage category according to IEC 61010-1	Category III
Resonance frequency	Approx. 1200 Hz

#### Medium data

Process temperature	-50...+150 °C (-58...+302 °F)
Process pressure	-1...64 bar/-100...6400 kPa (-14.51...+928.64 PSI)
Dynamic viscosity $\eta$	0.1...10000 mPa.s (requirement: with density 1)
Density	Selected by DIP switch: <ul style="list-style-type: none"> <li>• Standard sensitivity: 0.7...2.5 g/cm³</li> <li>• High sensitivity: 0.5...2.5 g/cm³</li> </ul>
Flow velocity	Max. 6 m/s (with a viscosity of 10000 mPa.s)

#### Process/Pipe connection & communication

Process connection	Thread G or NPT, ¾" or 1"; clamp 2"
--------------------	-------------------------------------

#### Approvals and conformities

##### Directives

CE directive	Further information on the CE Directive can be found in chapter <a href="#">“2.3. Standards” on page 5</a>
NAMUR recommendation	IEC 60947-5-6 (EN 50227)
Explosion protection	ATEX: EN 60079-0, EN 60079-11, EN 60079-26 Further information can be found in chapter <a href="#">“2.4. Explosion protection” on page 5.</a>

#### Environment and installation

Ambient temperature	<ul style="list-style-type: none"> <li>• Operating on the housing: -40...+70 °C (-40...+158 °F)</li> <li>• Storage and transport: -40...+80 °C (-40...+176 °F)</li> </ul>
Temperature derating	Further information can be found in chapter <a href="#">“5.1. Temperature derating diagram” on page 8.</a>
Relative air humidity	20...85 %, without condensation
Degree of protection according to IEC/EN 60529	IP66/IP67 with M20 × 1.5 gland mounted and tightened

### 1.3. Vibrating level switch with relay output

Product properties	
Operating mode	Adjustable <ul style="list-style-type: none"> <li>• A = max. detection or overflow/overflow protection</li> <li>• B = min. detection or dry run protection</li> </ul>
Electrical data	
Operating voltage	20...253 V AC, 50/60 Hz or 20...72 V DC (at U > 60 V DC the ambient temperature must be max. + 50 °C (+ 122 °F))
Protection class according to IEC 61010-1	I
Power consumption	1...8 VA (AC); approx. 1.5 W (DC)
Switching voltage	Max. 253 V AC/DC
Switching current	Max. 3 A (AC, cos phi > 0.9), 1 A (DC)
Switching power	<ul style="list-style-type: none"> <li>• Min. 50 mW</li> <li>• Max. 750 VA AC, 40 W DC (with U &lt; 40 V DC)</li> </ul>
Output	Relay (DPDT), 2 floating SPDTs
Process/Pipe connection & communication	
Electrical connection	2 cable glands M20 x 1.5

### 1.4. Vibrating level switch with NAMUR output

Product properties	
Operating mode	NAMUR output adjustable to falling or rising characteristics <ul style="list-style-type: none"> <li>• Min.: Rising characteristics (High current when wetted with liquid)</li> <li>• Max.: Falling characteristics (Low current when wetted with liquid)</li> </ul>
Electrical data	
Operating voltage	<ul style="list-style-type: none"> <li>• Voltage supply: via connection to an amplifier according to NAMUR IEC 60947-5-6, approx. 8.2 V</li> <li>• Open-circuit voltage: <math>U_0</math> approx. 8.2 V</li> <li>• Short-circuit current: <math>I_U</math> approx. 8.2 mA</li> </ul>
Protection class according to IEC 61010-1	II
Current consumption	<ul style="list-style-type: none"> <li>• Falling characteristic: <math>\geq 2.2</math> mA (blade uncovered) / <math>\leq 1.0</math> mA (blade covered)</li> <li>• Rising characteristic: <math>\leq 1.0</math> mA (blade uncovered) / <math>\geq 2.2</math> mA (blade covered)</li> <li>• Fault signal: <math>\leq 1.0</math> mA</li> </ul>
Output	2-wire current modulation according to NAMUR
Process/Pipe connection & communication	
Electrical connection	1 cable gland M20 x 1.5
Necessary processing system	NAMUR processing system according to IEC 60947-5-6 (EN 50227/DIN 19234)

## 2. Approvals and conformities

### 2.1. General notes

- The approvals and conformities listed below must be stated when making enquiries. This is the only way to ensure that the product complies with all required specifications.
- Not all available versions can be supplied with the below mentioned approvals or conformities.

### 2.2. Conformity

In accordance with the Declaration of Conformity, the product is compliant with the EU Directives.

### 2.3. Standards

The applied standards which are used to demonstrate compliance with the EU Directives are listed in the EU-Type Examination Certificate and/or the EU Declaration of Conformity.

### 2.4. Explosion protection

Approval	Description
	<p><b>Optional: Explosion protection</b> Ex marking of the components according to:</p> <p><b>ATEX:</b> PTB 07 ATEX 2004X</p> <ul style="list-style-type: none"> <li>• II 1/2G Ex ia IIC T6 Ga/Gb</li> <li>• II 2G Ex ia IIC T6 Gb</li> </ul> <p>Measures for compliance with ATEX/IECEx requirements: see <b>Additional manual/Supplement ATEX/IECEx Type 8112</b> ► under “User manuals”. The Ex. certification is only valid if the Bürkert device is used as described in the additional manual/supplement. Any unauthorized modifications made to the device will invalidate the Ex certification.</p>

6. Product installation

6.1. Installation notes

The vibrating level switch Type 8112 can be installed in any position. The instrument only has to be mounted in such a way that the tuning fork is at the height of the desired switching point.

The tuning fork has lateral markings (notches) that indicate the switching point with vertical mounting. The switching point refers to water with the basic setting of the sensitivity switch  $\geq 0.7 \text{ g/cm}^3$ .

Vertical installation	Horizontal installation
<p>Two diagrams illustrate vertical installation. The top diagram shows the switch mounted vertically with the tuning fork at the top. A dashed line indicates the switching point at approximately 13 mm. The bottom diagram shows the switch mounted vertically with the tuning fork at the bottom. A dashed line indicates the switching point at approximately 27 mm. Labels indicate 'Switching point approx. 13 mm', 'Switching point with lower density', 'Switching point with higher density', and 'Switching point approx. 27 mm'.</p>	<p>Two diagrams illustrate horizontal installation. The top diagram shows the switch mounted horizontally with the tuning fork at the top. A dashed line indicates the switching point. The bottom diagram shows the switch mounted horizontally with the tuning fork at the bottom. A dashed line indicates the switching point. Labels indicate 'Switching point', 'Recommended mounting position, particularly for adhesive products', and 'Marking with screwed variant on top'.</p>

7. Product operation

7.1. Measuring principle

The tuning fork is piezoelectrically energised and vibrates at a mechanical resonance frequency of approx. 1200 Hz. When the tuning fork is submerged in the product, the frequency changes. This change is detected by the integrated oscillator and converted into a switching command.

The integrated fault monitor detects the following faults:

- Interruption of the connection cable to the piezoelectric elements
- Extreme material wear on the tuning fork
- Breakage of the tuning fork
- Absence of vibration.

If one of these faults is detected or in case the power supply fails, the electronic system switches to a defined switching state, e.g. the relay de-energises (safe state).

8. Product accessories

**Note:**

The accessories must be ordered separately, see chapter “9.4. Ordering chart accessories” on page 11.

Accessory	Description
<p>Lock fitting</p> <p>Terminal screws (3 pcs.)</p> 	<p>The lock fitting is a threaded fitting and can be used together with the vibration level switch Type 8112. It must only be used in unpressurised vessels.</p> <p>The wetted parts of the lock fitting are made of stainless steel (316L).</p> <p>With the lock fittings, sensors with tube extension can be fixed infinitely. The terminal screws protect the tube against sliding through.</p> <p>The following versions are available: Ø 21.3 mm - G 1 or 1 NPT (AF 41)</p>

9. Ordering information

9.1. eShop

**Bürkert eShop – Easy ordering and quick delivery**

You want to find your desired Bürkert product or spare part quickly and order directly? Our online shop is available for you 24/7. Sign up and enjoy all the benefits.
